Oral Assessment, Treatment and Prevention (Oral ATP) Consent Form

Thank You for trusting Sand Lake Animal Clinic with the oral health care of your pet. Based on a previous assessment, we have graded your pet's oral health as below:

- Grade I - Teeth cleaned, full mouth radiographs, full oral exam and assessment by a veterinarian and no expected extractions. 30-45 minutes of anesthesia. \$410-\$460
- Grade II - Grade I plus mild pathology resulting in 2-3 extractions. 50-75 minutes of anesthesia. \$470-\$670
- Grade III - Grade I plus moderate pathology resulting in 4-6 extractions. 80-120 minutes of anesthesia. \$670-\$820
- Grade IV - Grade I plus severe pathology resulting in 7 + extractions. 120+ minutes of anesthesia. \$820-\$1370
- Unknown Grade - We have not previously graded or it has been more than 6 months since your pet's last exam so the grade may have changed.

Although we have given you an initial assessment of your pet's oral health, a thorough oral assessment is not complete until an exam is performed under anesthesia with intraoral radiographs. This may present us with previously undiagnosed pathology. It is essential that we have a good phone number to reach you in case we have to do more than previously thought. If we can not reach you, we will go no further than you previously approved and we will wake your pet up.

Phone Number _____

I have full understanding of the above information and price estimates. I consent to the treatment plan as outlined for me.
